

INSTALLATION MANUAL – AFTRO-I

Safety tips before installation

- * Let always an expert/authorized technician make the installation
- * Before you start please shut off the power to prevent electric shock
- * Consider always leave some space to the heatsink of the LED light, it needs to cool down after use
- * Do not connect any LED light without its recommended driver
- * Your individual product may vary from the design shown as following pictures
- * Do not disassemble your product
- * If any modification is made in the item or any wrong installation causes any damage to it, the warranty will be invalidated.

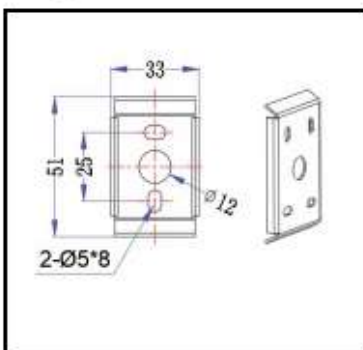

Step 1

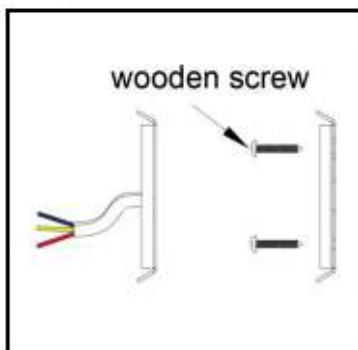

1. Loosen the M4 screws and remove the lamp holder

Step 2

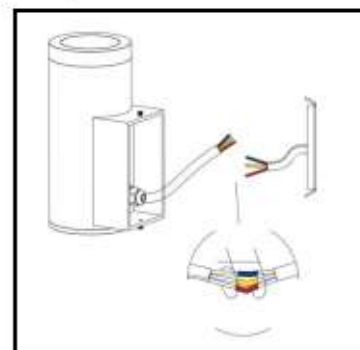

2. Drill four fixing holes and one threading hole on the wall according to the holes on the lamp holder. Insert a rubber plug or wood block into the holes.

Step 3

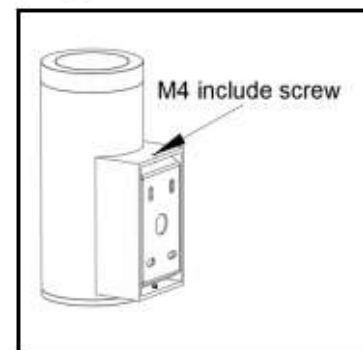

3. Pull out a power cord from the wall and pass it through the threading hole and then fix the lamp holder on the wall with wood screws.

Step 4

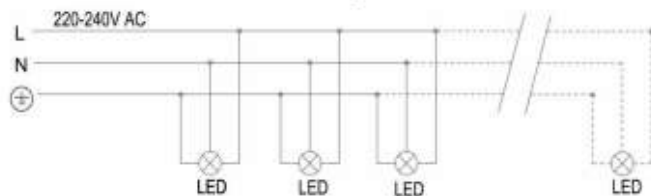

4. Connect power cord to the power cable of the lamps, and then tie it with waterproof tape or connector (waterproof measures must be taken).

Step 5

5. Clear the more cable, then put the lamp into the lamp holder and lock the M4 screws, Finished

220-240V AC :Circuit of product
